

Gaurav Kagdelwar

Solutions Architect

Multi-Cloud Data Engineering & Cloud Architecture Specialist | AI & Analytics Practitioner

Certified Data Engineering and Cloud Architecture professional with expertise across Google Cloud Platform, Microsoft Azure, AWS and Claude AI. Skilled in designing, building, and optimizing scalable data pipelines, cloud-native architectures, and AI-driven analytics solutions. Adept at enabling organizations to leverage multi-cloud strategies for data integration, governance, and advanced insights with 14+ years' experience leading cross-functional teams in the design, development, documentation, and delivery of process innovations driving the attainment of business goals.

- Seek opportunities to transform company practices into fresh, cost-effective solutions leading to more efficient operations with ability to deliver results in a high-energy, fast-paced environment.
- Experience working for a large organisation at a client location in onshore-offshore model across geographical diverse teams. Experience working as a hands-on architect responsible for technical decisions and seeing them through completion.
- Strong technical acumen across domains and technologies with good understanding of business with great zeal to learn.
- Ability to deliver, document and articulate complex architectures for the program at all levels: data, integration, application, security.
- Experience in delivering solutions within large-scale program deliveries with deep knowledge of software solution architecture concepts, practice and tools.
- Experience in breaking down a monolith into Microservice oriented architecture
- Experience with ERP, Energy, Banking, Media-Entertainment, Telecom industries
- Leveraging clients existing IT framework system for better data visibility and system integration.

Core Competencies

- **Data Engineering**
 - Design and implement ETL/ELT pipelines using GCP Dataflow, BigQuery, and Azure Data Factory
 - Optimize data storage and retrieval for structured and unstructured datasets
 - Implement data quality, governance, and security best practices
- **Cloud Architecture**
 - Architect scalable, secure, and cost-efficient solutions on GCP, Azure, and AWS
 - Design hybrid and multi-cloud strategies for enterprise workloads
 - Implement high-availability and disaster recovery solutions
- **Analytics & AI Integration**
 - Build advanced analytics platforms leveraging BigQuery ML, Vertex AI, and AWS AI services
 - Integrate machine learning models into data workflows for predictive insights
 - Enable real-time analytics and streaming data processing
- **Multi-Cloud Expertise**
 - Proficient in GCP services (BigQuery, Dataflow, Pub/Sub, Cloud Composer)
 - Skilled in Azure Synapse, Data Lake, and Data Factory
 - Familiar with AWS AI/ML services and data analytics offerings

- **Security & Compliance**
 - Implement IAM, encryption, and compliance frameworks across cloud environments
 - Ensure GDPR and enterprise data governance standards

RELEVANT WORK EXPERIENCE

Tech Mahindra, Pune/Belgium, India/BE

Indian IT Services technology company with 100000+ employees and \$1b+ annual revenue

Solution Architect/E2E Solution Designer - Present

- Analysed, designed, and built E2E solutions for enterprise level business to support the visualisation of their Telco/data stack using various COTS and sources by understanding and determining the impact and risk of changing the business processes
- Developed SQL scripts for query automation to remove the need for human interaction when executing SQL queries, this increased the volume and accuracy of queries being run by a huge percentage.
- Created a Build and Release process for multiple projects Strong understanding of Salesforce-CRM technology including technical and functional.
- Assisted in developing Project Scope, Business Requirements and Functional Requirements with internal team and clients with sound knowledge of SDLC cycle, Agile Methodologies, SCRUM, development, testing, deployment and support/baby-sitting phases.
- Strong work experience in DevOps model with good Communication skills and ability to interact client Teams
- Create ER diagrams and write relational database queries, create database objects, and maintain referential integrity
- Expert in trouble shooting, maintenance & support of Oracle PeopleSoft application and other integrated apps such as Content Mgmt
- Understanding customer requirements with possession of clarity of thought and communication to translate business requirements/ issues into technical requirements and design.
- Experience with architecture documentation and diagramming like UML, Archimate, draw.io etc.
- Experience in functional analysis and design, User stories and use cases with sound knowledge of Data structures & strong RDBMS skills.
- Extensive knowledge of Telecom Domain, E2E stack for Telecom and BSS/OSS expertise with Experience in E2E implementations, new development, modifications / medium to complex customization
- Have extensive experience dealing with SOAP API's and REST APIs based on TMF Standard
- Have extensive knowledge on EDM (Enterprise Data Modelling) and working in a container based and/or serverless Environment hosted on public/private cloud (Docker, OpenShift)
- Good understanding of CI/CD concepts, including version control, branching models with appropriate quality control techniques (SONAR) and automated deployments

Tools/Skills: E2E Solution Architecture & Design, ARIS based architecture design (ArchiMate), TM Forum Compliant API Design, Enterprise Data Model, Integration Experience, Multiple Design patterns, ICT-Telco, PeopleSoft, SQL, JIRA, Confluence, Azure, AWS, GCP(Google managed services), SOAP/REST API's, Microservice – Spring boot, Salesforce, TIBCO-Provisioning, BSCS (Billing System), Hansen Product Catalogue, Postman, Visual Studio

Accenture, India

NYSE-listed company

Software Engineering Senior Analyst 10/2014 – 01/2016

- Worked as a Software Engineering Sr. Analyst on PeopleSoft FSCM/Finance in Account Payables for Duke Energy.
- Worked as an offshore developer as part of the SUT (Sales and Use Tax) in Account Payable Module of PeopleSoft.
- Creation of new application packages related to the Tax Calculation Engine where the Vendor was to be replaced.
- Worked with Integration broker and web services as part of the project to consume the web service provided by the vendor and then breaking the same to create the XML required for the data to be processed by the invoices created by the AP.
- Worked on PS General Ledger as part of this project to load the voucher entries into GL via Journal Post.
- Worked throughout the build of the project and SIT (System and Integration testing) as part of the Waterfall SDLC model.
- Was the sole POC for offshore as part of Performance Testing and SIT and worked on HP Quality Center to create the defects and update the same.
- Worked as a Software Engineering Sr. Analyst on PeopleSoft CRM areas like Products, Order Management.

- Worked as part of the offshore development team on the CRM Module for DEX Media (An American Print and Digital Advertising Company)
- Worked on Product Setup, Application Package development and Peoplecode.
- Developed application engines, PeopleSoft pages and implemented the required functionality through Peoplecode.
- Worked on integration broker to integrate the 3rd party system through Java Web Services/SOAP-REST API's and then calling the same through Application Package Peoplecode to display the same on the page.
- Worked on data conversion as a part of the PeopleSoft team to integrate the ETL converted data smoothly in the PeopleSoft system.

Tools used: PeopleSoft, PeopleTools, SQL, JIRA, CRM

Cognizant, India

Indian IT Services technology company

Programmer Analyst 08/2011 – 09/2014

- Worked as a Programmer Analyst on PeopleSoft Finance for Lexis-Nexis.
- Created pages and application engines for Auto Debit Functionality of the client as part of the payment process.
- Created test cases, execution, and defect logging as a technical team SPOC.
- Worked as a Programmer Analyst on PeopleSoft Finance for Expense Module for Internal Project.
- Worked as a Production Support Analyst cum Developer as part of ESA team.
- Worked extensively as a part of Expense Module.
- Responsible to batch monitoring, scheduling, data gather for activities related to Expense.
- Creating application engines for automations of Expense Related transactions related to Cash, AMEX.
- Creation and working with File Layout as part of AMEX related transactions for Expense and association the uploading the data in the Expense Target Tables by associating the File through the Inbound Request and then processing the data in target tables with the help of a newly created and scheduled standard batch.
- Troubleshooting the issues and failures of the daily scheduled batches and finding the root cause either by applying trace or indexes.

Tools Used: PeopleSoft, PeopleTools, SQL, JIRA, CRM
